Exam Time	4:30 PM - 6:30 PM
Subject	Stenographer Grade C and D Examination 2023

Section : General Intelligence and Reasoning

Q.1 Select the option that is related to the sixth number in the same way as the first number is related to the second number and the third number is related to the fourth number.
1444 : 38 :: 1225 : 35 :: ? : 47

- Ans ☒ 1. 2209
☐ 2. 2162
☐ 3. 1024
☐ 4. 1369

Q.2 If 'A' stands for '+', 'B' stands for 'x', 'C' stands for '÷' and 'D' stands for '−', what will come in place of the question mark (?) in the following equation?
16 B 5 D 16 A 8 C 10 = ?

- Ans ☐ 1. 78
☐ 2. 58
☐ 3. 68
☒ 4. 88

Q.3 Which of the following numbers will replace the question mark (?) in the given series?
48, 200, 540, ?, 2240

- Ans ☒ 1. 1176
☐ 2. 1348
☐ 3. 1156
☐ 4. 1248

Q.4 Two statements are given, followed by two conclusions numbered I and II. Assuming the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the conclusions logically follow(s) from the statements.

Statements:

Some pianos are guitars.

All guitars are flutes.

Conclusion:

- Ans ☐ 1. Varun
- ☒ 2. Pramod
- ☐ 3. Mahesh
- ☐ 4. Amit

Q.17 Given below is a statement followed by two conclusions I and II. Study the statement carefully and decide which Conclusion/s is/are definitely true.

Statement: $M \geq N = O \geq P \leq W$; $X \leq O > Y$

Conclusion I: $M > Y$

Conclusion II: $X \leq W$

- Ans  1. Only Conclusion II is true.
 2. Only Conclusion I is true.
 3. Neither Conclusion I nor II is true.
 4. Both Conclusions I and II are true.

Q.18 Which figure should replace the question mark (?) in the following series to continue the pattern?

P	P	L	L	
A	3	3	O	?
O L 3	A O L	P A O	3 P A	

- Ans  1.

A
O
L 3 P
-  2.

- Ans
- ☐ 1. Pole
 - ☐ 2. Net
 - ☐ 3. Javelin
 - ☒ 4. Racquet

Q.22 Select the number from among the given options that can replace the question mark (?) in the following series.

23, 34, 45, 56, 67, ?

- Ans
- ☐ 1. 76
 - ☐ 2. 79
 - ☒ 3. 78
 - ☐ 4. 77

Q.23 How many triangles are there in the given figure?

- Ans
- ☐ 1. 10
 - ☒ 2. 11
 - ☐ 3. 9
 - ☐ 4. 12

Q.24 Which two numbers (not digits) should be interchanged to make the given equation correct?

$$(\sqrt{144} \div 4)^3 + (6)^2 - (28 \times 2) + 72 + (32 \div 8) \times 3 = 52$$

- Ans
- ☒ 1. 4 and 6
 - ☐ 2. 2 and 8
 - ☐ 3. 3 and 6
 - ☐ 4. 2 and 4

Q.25 In a certain code language, 'COFFEE' is written as 'FTKKJH' and 'EXPERT' is written as 'HCUJWW'. How will 'FRENCH' be written in that language?

An important skill we all need to learn, in my opinion, is not to have preconceived notions about anything. Having said that I also know how difficult a thing it can be!

To drop the burden of preconceived notions, we need to unlearn a few things, which again is a tough thing to do. Very early on, we start cramming our brains with ideas and opinions. These notions might have entered our mind from our family, parents, society or some of the books we might have read. We need to understand the fact that everything in life keeps changing and we just cannot stick to something only because that thought might have entered our brains years back!

I always thought ice-creams or chilled items were bad for a child having a cold or a running nose. I was terribly surprised when a GP in London told my four-year-old grandson with a cold to go ahead and have a popsicle. Later I found out that there is no scientific evidence to prove that an ice-cream or a popsicle can aggravate a cold!

Comprehension:

Read the given passage and answer the questions that follow.

Emma had always been a driven and ambitious student. She had a passion for science and medicine, and her dream was to become a doctor. She worked tirelessly throughout her college years, studying long hours and sacrificing her social life in pursuit of her goals. Despite the challenges, Emma was determined to succeed and make a difference in the world.

One fateful evening, while driving home from a late-night study session, Emma's life changed forever. A car came out of nowhere and collided with her vehicle, sending it spinning out of control. When the dust settled, Emma found herself trapped inside the wreckage, unable to move or even scream for help. The accident had left her with a broken leg and several other injuries. Emma was in shock and couldn't believe what had happened to her. She was devastated to think that all her hard work and dedication had been for nothing. She would now have to put her dreams on hold and spend months recovering from her injuries.

As Emma lay in the hospital, she was consumed with anger and frustration. She couldn't understand why this had happened to her, why her life had been turned upside down in an instant. She felt alone and helpless, unable to find any sense of purpose or meaning in her suffering. But as the days turned into weeks, Emma began to notice something different about the people around her. She met a nurse named Mary, who had been working at the hospital for over twenty years. Mary had a kind and caring personality, which Emma found comforting during her stay. She also met a patient named John, who had been in a car accident similar to Emma's. John had suffered a spinal cord injury and was paralysed from the waist down. Despite his condition, John was always positive and never gave up hope.

Emma soon realised that the accident had brought her into contact with these amazing people and had given her the opportunity to learn from them. She learned from Mary how to be kind and caring towards others, even in difficult situations. She learned from John how to be positive and never give up, even when things seem impossible. After several months of recovery, Emma was able to walk again, but she still faced many challenges. She had to work extra hard to catch up with her studies and she had to adjust to life with a permanent scar on her leg. However, she realised that the accident had taught her valuable lessons that would help her become a better doctor. She had learned to empathise with her patients and to be grateful for her own health.

Years later, Emma became a successful doctor and was known for her compassion and empathy towards her patients. She often thought back to the accident and realised that it had been a turning point in her life. It had forced her to slow down and appreciate the small things in life. She was grateful for the people she had met during her recovery and realised that without the accident, she may never have met them. This story reflects that whatever happens, it happens for good. Even though the accident had seemed like a setback for Emma, it had brought her into contact with amazing people and taught her valuable lessons that she would carry with her for the rest of her life. Sometimes, the things we think are obstacles are actually opportunities in disguise. It is up to us to find the silver lining and make the best of every situation.

SubQuestion No : 91

Q.91 What is the significance of the patient John in the story?

- Ans**  1. He helps Emma recover from her injuries and shows her how to be positive and never give up

However, she realised that the accident had taught her valuable lessons that would help her become a better doctor. She had learned to empathise with her patients and to be grateful for her own health.

Years later, Emma became a successful doctor and was known for her compassion and empathy towards her patients. She often thought back to the accident and realised that it had been a turning point in her life. It had forced her to slow down and appreciate the small things in life. She was grateful for the people she had met during her recovery and realised that without the accident, she may never have met them. This story reflects that whatever happens, it happens for good. Even though the accident had seemed like a setback for Emma, it had brought her into contact with amazing people and taught her valuable lessons that she would carry with her for the rest of her life. Sometimes, the things we think are obstacles are actually opportunities in disguise. It is up to us to find the silver lining and make the best of every situation.

Q.94 What was Emma's dream before the accident?

Ans

✓ 1. To become a doctor

✗ 2. To become a teacher

✗ 3. To become a lawyer

✗ 4. To become a nurse

Comprehension:

Read the given passage and answer the questions that follow.

Emma had always been a driven and ambitious student. She had a passion for science and medicine, and her dream was to become a doctor. She worked tirelessly throughout her college years, studying long hours and sacrificing her social life in pursuit of her goals. Despite the challenges, Emma was determined to succeed and make a difference in the world.

One fateful evening, while driving home from a late-night study session, Emma's life changed forever. A car came out of nowhere and collided with her vehicle, sending it spinning out of control. When the dust settled, Emma found herself trapped inside the wreckage, unable to move or even scream for help. The accident had left her with a broken leg and several other injuries. Emma was in shock and couldn't believe what had happened to her. She was devastated to think that all her hard work and dedication had been for nothing. She would now have to put her dreams on hold and spend months recovering from her injuries.

As Emma lay in the hospital, she was consumed with anger and frustration. She couldn't understand why this had happened to her, why her life had been turned upside down in an instant. She felt alone and helpless, unable to find any sense of purpose or meaning in her suffering. But as the days turned into weeks, Emma began to notice something different about the people around her. She met a nurse named Mary, who had been working at the hospital for over twenty years. Mary had a kind and caring personality, which Emma found comforting during her stay. She also met a patient named John, who had been in a car accident similar to Emma's. John had suffered a spinal cord injury and was paralysed from the waist down. Despite his condition, John was always positive and never gave up hope.

Emma soon realised that the accident had brought her into contact with these amazing people and had given her the opportunity to learn from them. She learned from Mary how to be kind and caring towards others, even in difficult situations. She learned from John how to be positive and never give up, even when things seem impossible. After several months of recovery, Emma was able to walk again, but she still faced many challenges. She had to work extra hard to catch up with her studies and she had to adjust to life with a permanent scar on her leg. However, she realised that the accident had taught her valuable lessons that would help her become a better doctor. She had learned to empathise with her patients and to be grateful for her own health.

Q.95 Find the ANTONYM of the word 'aggravate' from the passage.

Ans

☒ 1. Oblige

☐ 2. Irritate

☐ 3. Tease

☐ 4. Dedicate

Comprehension:

Read the given passage and answer the questions that follow.

The term 'personalised learning' has been in vogue for a long time. Earlier, it referred to a one-to-one tutoring system, mostly for the privileged. Today, it refers to learning that prioritises an individual student's requirements and uses flexible instructional practices in terms of content, pace and materials. Learning need not be linear as, sometimes, learners may have to take a step back if not equipped with the necessary schemata to understand the content. The entire learning process becomes student-centric and the students are encouraged to design their own learning pathways. Artificial Intelligence (AI) and Data Analytics play a major role in online and hybrid learning platforms. Globally, HEIs are introducing programmes where AI provides the platform to launch personalised learning. Technology provides a variety of materials in various formats to suit different students and monitor and assess their progress. However, it does not undermine the teacher's role. There are areas such as communication and collaborative skills, and emotional intelligence, which require human intervention. Therefore, the role of teachers in personalised learning remains as important as it is in traditional learning. AI can never replace educators; it can only enhance and support personalised learning by providing automated tasks, assessment platforms and feedback. Many paths of study emerge and all ultimately merge with the curriculum's common learning outcome. Thus, the pattern of education becomes student-centric. This systemic change gives a new dimension to the teaching-learning process where teaching becomes counseling, and the teacher becomes a mentor. The students are motivated to take control of their learning and become autonomous.
